Description & Key Benefits

Granitex chip flooring is a composition of multi-colored vinyl chips embedded in a pigmented base coat and sealed with successive coats of clear glaze. You may choose from a variety of colors and chip sizes to get the look that you desire. For example, larger chips create the look of terrazzo or granite, while smaller chips give a hard surface carpet appearance. In addition to these customizable options, our Granitex systems offers proven durability and longevity for a multitude of applications.

Common Applications

- Garage Floors
- Driveways
- Clean Rooms
- Laboratories
- Offices
- Restaurant Interiors
- Retail Establishments
- Showrooms
